Note to the Installer
Read all of the instructions the building, as close to the point of cable be connected to the grounding system of the NEC (Section 54, Part I of the Canadian This reminder is provided to call the CATV

Note to CATV System Installer
Comply with all warning and caution symbols that are included in this guide. Scientific-Atlanta reserves the right to make any kind of contact with any inside part of this product.

Ventilation
This equipment has openings for ventilation that protect it from overheating. To ensure the reliability of this equipment, do not obstruct the openings:
• Do not place other equipment, lamps, books, or any other object on the top of this equipment.
• Do not place this equipment in any of the following locations:
  - On a bed, sofa, rug, or similar surface.
  - Over a radiator or a heat register.
  - In an enclosed or a location, such as a bookcase or equipment rack, unless the installation provides proper ventilation.

Cleaning the Equipment
Before cleaning this equipment, unplug it from the electrical outlet. Use a damp cloth to clean this equipment.
Do not use a liquid cleaner or a spray cleaner. Do not use a magnetic/static cleaning device (dust remover) to clean this equipment.

Object and Liquid Entry
Never push objects of any kind into this equipment through open panels that may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Do not expose this equipment to liquid or moisture.
Do not place this equipment on a wet surface. Do not spill liquids on or near this equipment.

Accessories
Do not use accessories with this equipment unless recommended by your cable service provider.

Lightning and Power Surges
Ground (earth) your cable system to provide some protection against lightning strikes and power surges. If you have questions, call your cable service provider.

Power Cord Protection
Arrange all power cords so that people cannot walk on the cords, place objects on the cords, or place objects against the cords. This can damage the cords. Give particular attention to the cords at the points at which the cord connects to the plug, at electrical outlets, and at the places where the cords exit the equipment.

Power Sources
A label on this equipment indicates the correct power source for this equipment. Operate this equipment only from an electrical outlet that has the voltage and frequency that the label indicates.

If you are unsure of the type of power supply to your residence, contact your cable service provider or your local power company.

Grounding
Make sure that your cable system is grounded in order to provide some protection against lightning strikes and power surges. If you have questions, call your cable service provider.

CAUTION: To prevent electric shock, match wide blade of plug to wide slot, and fully insert.

Damage that Requires Service
For damage that requires service, unplug this equipment from the electrical outlet. Refer servicing to qualified service personnel when any of the following occurs:
• There is damage to the power cord or plug.
• Liquid enters the equipment.
• A heavy object falls on the equipment.
• There is exposure to rain or water.
• Operation is not normal (the instructions in this guide describe the proper operation).
• If you drop this equipment, or damage the cabinet of this equipment.

If you open the cover of this equipment, you may be exposed to hazardous voltage points. All servicing must be performed by qualified personnel only. Contact your cable service provider for instructions.

Servicing
If this equipment exhibits a distinct change in performance, unplug this equipment from the electrical outlet. Check the power cord and plug. If there is any damage, unplug the equipment and refer servicing to qualified service personnel.

This device has a two-prong plug. Properly ground (earth) this equipment by inserting the plug into a grounded electrical, two- socket outlet. If this plug is polarized, it has one wide prong and one narrow prong. This plug fits only one way.
To access the Explorer eClub Web site type: ____________________________.

Keep the top of the Explorer 1850 DHCT free of discoloration or dust. If necessary, wipe the top with a soft cloth moistened with water. The Explorer 1850 DHCT is not intended for use where subject to excessive moisture, dust, or temperature extremes.

Power Provides power to the DHCT. The light above the Power key illuminates when the power is on. To receive nightly programming updates, keep the power on.

Accessing Programs

Access Cable Services and Programs

You can access your cable services using the remote control or the keys on the front panel of the DHCT. (Refer to your remote control user’s guide for programming instructions.)

1. Press the Guide key to access the on-screen guide. The on-screen guide displays schedules of TV programs and other services available from your cable service provider, such as video-on-demand, or pay-per-view programs.

2. Press the Info key to display the selected program—available from the on-screen guide and while viewing a program.

3. Press the Exit key to exit menus, on-screen guide, and program information.

4. Press the Select key to access your on-screen selection

5. Press the Guide key to access on-screen services, such as the on-screen guide, video-on-demand, or pay-per-view.

6. Press the Exit key to exit menus, on-screen guide, and program information.

7. Press the Bypass light is off.

8. Press the AC Switched Outlet key to connect the AC power cord from another device, such as a TV or VCR.

9. Press the Power key on the DHCT.

Other Types of Connections

If you are connecting the DHCT to a different type of TV or VCR, or to additional devices, contact your cable service provider, or access the Explorer eClub Web site: www.scientificatlanta.com/explorerclub

The serial number is located in the lower left corner of the bar code. Write the serial number here: ____________________________
