

SET-UP GUIDE

# ExperienceIQ: Enhanced Parental Control

If you subscribe to **ExperienceIQ** Enhanced Parental Controls from your service provider you'll have additional functionality to help manage access to the Internet within your home.

Start by selecting the + sign in the top right to create a profile. You'll be able to assign a name to the profile and assign the devices you want attached to this profile. You can also select the photo icon on add a picture to represent this profile. After selecting submit those devices selected are now assigned to the profile you have created. You can easily remove them by tapping the Remove button beside the desired device.

If you want to manually pause the devices assigned to this profile, simply select the pause button in the profile header. The white bar will show the current state of this profile, in the example shown you can see this profile is currently Connected, there is 1 device assigned to the profile and there has been no usage on this profile today.

Parental controls work while devices are connected to WiFi.

Note: If a device has the app, do not add it to a profile, as you may inadvertently cut off your access to these controls. If this happens, switch to mobile data, to restart the profile with your app device.
